James & Son Ltd

1. General Statement of Policy

The Company recognises the need to carry out aspects of its operations so as to have minimum impact on the existing environment.

It is committed to implement and promote an overall awareness in relation to our environment so far as is reasonably practicable.

James and Son will monitor and review their environmental performance and continually look for ways to improve.

This shall be achieved by:

- Reviewing all working procedures and practices which have an impact on our environment
- Examination and assessment of all plant and machinery which may have an environmental impact.
- Provide suitable information and training to our employees and others under our control on the necessity to carry out their duties such that any environmental impact is minimised.

2. Arrangements for Reducing Environmental Impact

2.1 Sourcing Materials

- To utilise raw materials and processes which make a minimum demand on the environment and produce minimum waste.
- Take positive action to conserve resources with paying particular attention to scarce or non-renewable sources.
- To include environmental impact when evaluating suppliers and supplies.

James & Son Ltd

2.2. Production

- Where possible to use environmentally friendly materials which last, may be recycled and/or reconditioned, are energy efficient and produce or create minimal harmful waste when disposed of.
- To consider environmentally friendly improvements to production technology including recycling.

2.3 Waste and Recycling

- To minimise the waste produced through the businesses activities and look for innovative ways to re-use processed generated materials and products.
- To consider suitable economic supplies of recycled materials.

2.4 Energy

- To reduce the overall contribution of the businesses global warming by optimising energy usage.

2.5 Buildings

- Maintain the appearance of the company's property to a visually acceptable standard.
- To consider the global and local implications of any planned development.

2.6 Transport and Distribution

- To utilise efficient distribution and transport systems for goods and personnel.
- To encourage staff to use public transport where practical.
- To consider fuel/C02 efficient company vans and cars when purchasing new vehicles.
- To regularly service all company vehicles.
- To monitor and review company car fuel usage.

James & Son Ltd

2.7 Clients

- To provide information as necessary to enable manufactured items to be properly used, stored and disposed of so as to avoid damage to the environment.

2.8 Industry

- To play an active role where possible in development of good environmental practice in the industry through seeking partnerships and collaborating with other businesses.

2.9 Investors and Investments

- To attain a profile with investors as an environmentally friendly investment.
- To include environmental performance as a consideration for the investment of company funds.

2.10 Employment and Training

Ensure that all employees and personnel operating within the companies are in position to improve environmental performance by providing appropriate information, training and consultation processes, etc.
